Ph.D. MATHEMATICIANS

Our Systems Analysis Department has openings for Ph.D. Mathematicians who have a lasting interest in some fields of Mathematics such as Algebra, Geometry, Measure Theory, Topology, Differential Equations, Numerical Analysis, Statistics, or Probability Theory. Association will be with others with similar educational background engaged in the study of challenging problems vital to the nation's welfare.

The work is of an independent research nature with supervision at a minimum and by people of similar interests who are aware of the needs of research personnel.

Sandia Corporation, engaged in research and development of nuclear weapons, is located in Albuquerque, N.M.—a metropolitan city of 208,000 famous for its splendid climate and its outstanding recreational and cultural attractions. Excellent working conditions and liberal employee benefits, including generous vacations and holidays; retirement, hospital, and insurance plans.
