

## BRIEF MENTION

*Functions of real and complex variables.* By W. F. Osgood. New York, Chelsea, 1958. 12+407 and 8+262 pp. \$4.95.

Reprints of these two books, first published in 1935, are now re-issued bound in one volume.

*Elementary number theory.* By E. Landau. Trans. by Jacob E. Goodman. New York, Chelsea, 1958. 256 pp. \$4.95.

This is an English translation of the author's *Elementare Zahlentheorie* (vol. 1<sub>1</sub> of *Vorlesungen über Zahlentheorie*), with added exercises by P. T. Bateman and E. E. Kohlbecker.

*Lehrbuch der Combinatorik.* By E. Netto. 2d ed. (1927). New York, Chelsea, 1958. 8+341 pp. \$4.95.

*Calculus of finite differences.* By George Boole. 4th ed., New York, Chelsea, 1958. 12+336 pp. \$4.95.

*Traité des substitutions et des équations algébriques.* New ed., Paris, Blanchard, 1957. 18+667 pp. Fr. 7500.

This is a photographic reproduction of the treatise originally published in 1870.

*Collected papers of Professor R. Vaidyanathaswamy.* Madras, University of Madras, 1957. 7+589 pp. Rs. 15.
