A message from the editorial board	1
N. KANNAN and D. KUNDU Simple step-stress models with a cure fraction	2
F.P. LIMA and F. CRIBARI-NETO Bootstrap-based testing inference in beta regressions	18
W. ZHANG, J. WANG, F. QIAN and Y. CHEN A joint mean-correlation modeling approach for longitudinal zero-inflated count data	35
F. B. GONÇALVES, M. O. PRATES and V. H. LACHOS Robust Bayesian model selection for heavy-tailed linear regression using finite mixtures	51
D. BHATTACHARYA and S. BHATTACHARYA Effects of gene–environment and gene–gene interactions in case-control studies: A novel Bayesian semiparametric approach	71
F. CASTELLARES, A. J. LEMONTE and M. A. C. SANTOS On the Nielsen distribution	90
A. YOUNSO Nonparametric discrimination of areal functional data	112
N. SHENKMAN A primer on the characterization of the exchangeable Marshall–Olkin copula via monotone sequences	127
A. ANASTASIOU and R. E. GAUNT Multivariate normal approximation of the maximum likelihood estimator via the delta method	136
A. HAIDARI, A. T. PAYANDEH NAJAFABADI and N. BALAKRISHNAN Application of weighted and unordered majorization orders in comparisons of parallel systems with exponentiated generalized gamma components	150
M. ARSHAD and O. ABDALGHANI On estimating the location parameter of the selected exponential population under the LINEX loss function	167
S. NADARAJAH and Y. SI A note on the “L-logistic regression models: Prior sensitivity analysis, robustness to outliers and applications”	183
D. A. C. MOLLINEDO $W^{1,p}$ -Solutions of the transport equation by stochastic perturbation	188
