

# Contents

<b>H. CHEN, Q. LI and F. ZHU</b> Two classes of dynamic binomial integer-valued ARCH models.....	685
<b>V. M. M. PUREZA, P. C. OPRIME, A. F. B. COSTA and D. MORALES</b> Bi-objective mathematical model for optimal sequencing of two-level factorial designs .....	712
<b>Y. HAMURA and T. KUBOKAWA</b> Proper Bayes minimax estimation of parameters of Poisson distributions in the presence of unbalanced sample sizes .....	728
<b>S. AMIRI, M. JAFARI JOZANI and R. MODARRES</b> On multiple imputation for unbalanced ranked set samples with applications in quantile estimation.....	752
<b>G. YANG, Q. WANG, X. CUI and Y. MA</b> Generalized partially linear single index model with measurement error, instruments and binary response .....	770
<b>R. E. GAUNT, G. MIJOLE and Y. SWAN</b> Some new Stein operators for product distributions .....	795
<b>J. A. VILLASEÑOR and E. GONZÁLEZ-ESTRADA</b> On testing exponentiality based on a new estimator for the scale parameter ...	809
<b>N. KOLEV</b> Discrete line integral on uniform grids: Probabilistic interpretation and applications .....	821
<b>C. BARNES and A. SARANTSEV</b> A note on jump Atlas models .....	844
<b>C. Y. DOREA, D. B. FERREIRA and M. A. OLIVEIRA</b> Asymptotics for heavy-tailed renewal-reward processes and applications to risk processes and heavy traffic networks .....	858
<b>H. M. BARAKAT, E. M. NIGM and M. H. HARPY</b> Asymptotic behavior of the maximum of multivariate order statistics in a norm sense .....	868
<b>A. OLENKO and D. OMARI</b> Reduction principle for functionals of strong-weak dependent vector random fields.....	885
