Mat[hem]atical Analysis and Num[er]ical Methods for S[cie]nce and Technology

V[olu]me 6
F[u]n[ctio]nal and Variational Methods

[S]pringer-Verlag

Mathematical Analysis and Numerical Methods for Science and Technology compiles the mathematical knowledge required by researchers in mechanics, physics, engineering, chemistry and other branches of mathematics applied to the theoretical and numerical resolution of physical models on computers.

The advent of high-speed computers has revolutionised methods of computation. For the first time it is possible to calculate values from models accurately and rapidly. Researchers and engineers thus have a crucial means of using numerical results to modify and adapt arguments and experiments along the way.

Since the publication in 1924 of the "Methoden der mathematischen Physik" by Courant and Hilbert, there has been no other comprehensive and up-to-date publication presenting the mathematical tools needed in applications of mathematics in directly implementable form.

Volume 1:

Physical Modelling and Potential Theory

1989. Approx. 780 pages. Hard cover approx. DM 198,-. Prepublication price (valid only up to publication) approx. DM 168,-. ISBN 3-540-50207-6

Contents:
Chapter I: Physical Examples
Chapter II: The Laplace Operator

Volume 2:

Functional and Variational Methods

1988. 20 figures. 670 pages. Hard cover DM 198,-. Prepublication price (valid only up to publication) DM 168,-. ISBN 3-540-19045-7

Contents:
Chapter III: Functional Transformations
Chapter IV: Sobolev Spaces
Chapter V: Linear Differential Operators
Chapter VI: Operators in Banach Spaces and in Hilbert Spaces
Chapter VII: Linear Variational Problems. Regularity

Volume 3:

Spectral Theory and Applications

1989. Hard cover approx. DM 198,-. Prepublication price (valid only up to publication) approx. DM 168,-. ISBN 3-540-50208-4

Contents:
Chapter VIII: Spectral Theory
Chapter IX: Examples in Electromagnetism and Quantum Physics

Volume 4:

Integral Equations and Numerical Methods

1989. Hard cover approx. DM 198,-. Prepublication price (valid only up to publication) approx. DM 168,-. ISBN 3-540-50209-2

Contents:
Chapter X: Mixed Problems and Tricomi Equation
Chapter XI: Integral Equations
Chapter XII: Numerical Methods for Stationary Problems
Chapter XIII: Approximation of Integral Equations by Finite Elements. Error Analysis

Volume 5:

Evolution Problems I

1989. Hard cover approx. DM 198,-. Prepublication price (valid only up to publication) approx. DM 168,-. ISBN 3-540-50205-X

Contents:
Chapter XIV: Evolution Problems: Cauchy Problems in $\mathbb{R}^n$
Chapter XV: Evolution Problems: The Method of Diagonalisation
Chapter XVI: Evolution Problems: The Method of Laplace Transformation
Chapter XVII: Evolution Problems: The Method of Semigroups
Chapter XVIII: Evolution Problems: Variational Methods

Volume 6:

**Evolution Problems II
- The Navies-Stokes and Transport Equations in Numerical Methods -**

1989. Hard cover approx. DM 198,-. Prepublication price (valid only up to publication) approx. DM 168,-. ISBN 3-540-50206-8

Contents:
Chapter XIX: The Linearised Navier-Stokes Equations
Chapter XX: Numerical Methods for Evolution Problems
Chapter XXI: Transport
