**Abstract.** Discrete versions of several classical integrable systems are investigated, such as a discrete analogue of the higher dimensional force-free spinning top (Euler-Arnold equations), the Heisenberg chain with classical spins and a new discrete system on the Stiefel manifold. The integrability is shown with the help of a Lax-pair representation which is found via a factorization of certain matrix polynomials. The complete description of the dynamics is given in terms of Abelian functions; the flow becomes linear on a Prym variety corresponding to a spectral curve. The approach is also applied to the billiard problem in the interior of an  $N$ -dimensional ellipsoid.

## Table of Contents

0. Introduction . . . . .	218
1. Discrete Version of the Dynamics of a Rigid Body . . . . .	221
1.1. The Equation of “Motion” . . . . .	221
1.2. The Solution of the Matrix Eq. (6): $\omega^T J - J\omega = M$ . . . . .	224
1.3. Isospectral Deformations . . . . .	226
1.4. The Symplectic Geometry of Eq. (6) . . . . .	227
1.5. The Integration of the Discrete Euler Equation . . . . .	230
1.6. Explicit Formulas for the Discrete Dynamics of the 3-Dimensional Rigid Body. . . . .	233
2. The Discrete Dynamics on Stiefel Manifolds and the Heisenberg Chain with Classical Spins . . . . .	235
2.1. The Equation of the Dynamics and Isospectral Deformations . . . . .	235
2.2. Discrete Version of the C. Neumann System and the Heisenberg Chain with Classical Spins . . . . .	236
3. The Billiard Inside an Ellipsoid . . . . .	238
3.1. The Splittings and Isospectral Deformations. . . . .	239
3.2. Connection Between the Ellipsoidal Billiard and the Discrete C. Neumann System . . . . .	241
References . . . . .	242
