

## Up-to-date results focused in one journal ...

Shock Waves - An International Journal collates reviews, contributed papers, and short notes from the field, at present spread throughout the literature, in one focused journal.

You will find essential and current results on shockwave phenomena from both the fundamental research and the applications points of view, the most recent experimental techniques, and a comprehensive overview of the developments in the field. Each issue is rounded off by news and meeting reports of interest to the shock-wave community.

Essential to all physicists, chemists, and engineers working in

- aerodynamics and gas dynamics
- physical chemistry
- shock waves in condensed matter
- detonation, explosion and reactive flows
- computational fluid dynamics
- hypervelocity impact and dynamic high-pressure research
- plasma physics
- shock wave therapy

Editor-in-Chief: I.I. Glass, Ontario, Canada Managing Editors: R.A. Graham, Albuquerque, USA H. Grönig, Aachen, FRG, K. Takayama, Sendai, Japan In cooperation with an international Editorial Board
