

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 24, Numbers 5-6

May/June 2011

Alex Meril, Gisèle M. Mophou, and Gaston M. N'Guérékata, Asymptotic behavior of bounded mild solutions of some functional differential and fractional differential equations	401
Nakao Hayashi, Chunhua Li, and Pavel I. Naumkin, On a system of nonlinear Schrödinger equations in 2d	417
S.P. Hastings and J.B. Mcleod, Short proofs of results by Landesman, Lazer, and Leach on problems related to resonance	435
Xin Yu, Generalized Strichartz estimates on perturbed wave equation and applications on Strauss conjecture	443
Ionuț Munteanu, Tangential feedback stabilization of periodic flows in a 2-D channel	469
Vittorio Martino, A symmetry result on Reinhardt domains	495
Nicolas Godet, Blow up in several points for the nonlinear Schrödinger equation on a bounded domain	505
Makoto Nakamura, Remarks on Keel-Smith-Sogge estimates and some applications to nonlinear higher order wave equations	519
X. Carvajal, M. Panthee, and M. Scialom, On the critical KdV equation with time-oscillating nonlinearity	541
Takashi Narazaki, Global solutions to the Cauchy problem for a system of damped wave equations	569
