

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 24, Numbers 3-4

March/April 2011

Shinji Kawano , A remark on the uniqueness of positive solutions to semilinear elliptic equations with double-power nonlinearities	201
Xuwen Chen , Classical proofs of Kato type smoothing estimates for the Schrödinger equation with quadratic potential in \mathbb{R}^{n+1} with application .	209
Yan Lv, Boling Guo, and Xiaoping Yang , Dynamics of stochastic Klein–Gordon–Schrödinger equations in unbounded domains	231
Geordie Richards , Mass concentration for the Davey-Stewartson system .	261
Elisandra Gloss , Standing waves for a system of nonlinear Schrödinger equations in \mathbb{R}^N	281
Jaffar Ali, Ken Brown, and R. Shivaji , Positive solutions for $n \times n$ elliptic systems with combined nonlinear effects	307
José Raúl Quintero , The Cauchy problem and stability of solitary waves for a 2D Boussinesq-KdV type system	325
Eun Kyoung Lee, R. Shivaji, and Jinglong Ye , Classes of infinite semipositone $n \times n$ systems	361
Ioana Ciotir , A Trotter-type theorem for nonlinear stochastic equations in variational formulation and homogenization	371
J. Fleckinger, J.-P. Gossez, and F. de Thélin , Maximum and antimaximum principles near the second eigenvalue	389
