

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 23, Numbers 7-8

July/August 2010

Yoshie Sugiyama , Asymptotic profile of blow-up solutions of Keller-Segel systems in super-critical cases	601
Yoshie Sugiyama , Blow-up criterion via scaling invariant quantities with effect on coefficient growth in Keller-Segel system	619
Takayoshi Ogawa and Hiroshi Takeda , Global existence of solutions for a system of nonlinear damped wave equations	635
Daniel Daners and James B. Kennedy , On the asymptotic behaviour of the eigenvalues of a Robin problem	659
Munemitsu Hirose , Existence of global solutions to the cauchy problem for some reaction-diffusion system	671
Bui An Ton , Elliptic free boundary transmission, the Bernoulli and the obstacle problems	685
Claudianor O. Alves, Giovany M. Figueiredo, and Marcelo F. Furtado , Multiple solutions for critical elliptic systems via penalization method	703
Elena I. Kaikina and Isahi Sánchez-Suárez , Square root of absolute value of derivative on a segment	725
Hassan Dadashi-Arani and Bijan Z. Zangeneh , Large deviation principle for semilinear stochastic evolution equations with monotone nonlinearity and multiplicative noise	747
Rachid Benkhalti, Khalil Ezzinbi, and Samir Fatajou , Stable and unstable manifolds for nonlinear partial neutral functional differential equations	773
Laura Angeloni and Gianluca Vinti , Errata Corrige to: “Approximation by means of nonlinear integral operators in the space of functions with bounded φ -variation”	795
