

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 24, Numbers 7-8

July/August 2011

F.D. Araruna, M.R. Clark, and O.A. Lima, On internal elastic membrane with strong damping	601
Giovanni Cupini, Cristina Marcelli, and Francesca Papalini, Heteroclinic solutions of boundary-value problems on the real line involving general nonlinear differential operators	619
Shu-Yu Hsu, Gradient estimates for a nonlinear parabolic equation under Ricci flow	645
Vedran Sohinger, Bounds on the growth of high Sobolev norms of solutions to nonlinear Schrödinger equations on S^1	653
Marcelo F. de Almeida and Lucas C. F. Ferreira, On the well posedness and large-time behavior for Boussinesq equations in Morrey spaces	719
Natalia Skripnik, The partial averaging of fuzzy impulsive differential inclusions	743
Luc Molinet, A note on ill posedness for the KdV equation	759
Aleksander Ćwiszewski, Periodic solutions of damped hyperbolic equations at resonance: a translation along trajectories approach	767
T. Suebcharoen, B. Van Brunt, and G.C. Wake, Asymmetric cell division in a size-structured growth model	787
