

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 30, Numbers 9-10

September/October 2017

Giovanni Molica Bisci, Dimitri Mugnai, and Raffaella Servadei, On multiple solutions for nonlocal fractional problems via ∇ -theorems	641
Carlos Lizama, Jaqueline G. Mesquita, Rodrigo Ponce, and Eduard Toon, Almost automorphic solutions of Volterra equations on time scales	667
Hiroki Sano and Naoki Tanaka, Well-posedness and flow invariance for semilinear functional differential equations governed by non-densely defined operators	695
Alex H. Ardila, Logarithmic NLS equation on star graphs: existence and stability of standing waves	735
Isao Kato and Kotaro Tsugawa, Scattering and well-posedness for the Zakharov system at a critical space in four and more spatial dimensions	763
Peter Lindqvist, The time derivative in a singular parabolic equation	795
