

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 31, Numbers 3-4

March/April 2018

Yukihiko Nakata and Gergely Röst , Global stability of an SIS epidemic model with a finite infectious period	161
Igor Kukavica, Kerem Uğurlu, and Mohammed Ziane , On the Galerkin approximation and strong norm bounds for the stochastic Navier-Stokes equations with multiplicative noise	173
Yoshikazu Giga, Slim Ibrahim, Shengyi Shen, and Tsuyoshi Yoneda , Global well posedness for a two-fluid model	187
Mark Allen , A nondivergence parabolic problem with a fractional time derivative	215
José V. Gonçalves, Marcos L. Carvalho, and Carlos Alberto Santos , Quasilinear elliptic systems convex-concave singular terms and Φ -Laplacian operator	231
Anna Lisa Amadori, Francesca Gladiali, and Massimo Grossi , Nodal solutions for Lane-Emden problems in almost-annular domains ...	257
César Augusto Bortot and Wellington José Corrêa , Exponential stability for the defocusing semilinear Schrödinger equation with locally distributed damping on a bounded domain	273
Kazuo Yamazaki , Horizontal Biot-Savart law in general dimension and an application to the 4D magneto-hydrodynamics	301
