

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 31, Numbers 9-10

September/October 2018

Aleks Jevnikar, Juncheng Wei, and Wen Yang, Classification of blow-up limits for the sinh-Gordon equation	657
Yuji Sagawa, Hideaki Sunagawa, and Shunsuke Yasuda, A sharp lower bound for the lifespan of small solutions to the Schrödinger equation with a subcritical power nonlinearity	685
Sebastian Herr and Changhun Yang, Critical well-posedness and scattering results for fractional Hartree-type equations	701
Jingbo Dou and Ye Li, Nonexistence of positive solutions for a system of semilinear fractional Laplacian problem	715
Toshiaki Yachimura, Two-phase eigenvalue problem on thin domains with Neumann boundary condition	735
Meirong Zhang, Zhiyuan Wen, Gang Meng, Jiangan Qi, and Bing Xie, On the number and complete continuity of weighted eigenvalues of measure differential equations	761
