

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 31, Numbers 11-12

November/December 2018

Van Hoang Nguyen and Futoshi Takahashi , On a weighted Trudinger-Moser type inequality on the whole space and related maximizing problem	785
Mikil D. Foss, Petronela Radu, and Cory Wright , Existence and regularity of minimizers for nonlocal energy functionals	807
Vera Mikyoung Hur , Norm inflation for equations of KdV type with fractional dispersion	833
Takeshi Gotoda , Global solvability for two-dimensional filtered Euler equations with measure valued initial vorticity	851
Giacomo Marchesi, Alessandro Portaluri, and Nils Waterstraat , Not every conjugate point of a semi-Riemannian geodesic is a bifurcation point	871
Pavol Quittner , Uniqueness of singular self-similar solutions of a semilinear parabolic equation	881
Pitágoras P. Carvalho and Enrique Fernández-Cara , Weak-renormalized solutions for a simplified $k - \varepsilon$ model of turbulence	893
AUTHOR INDEX FOR VOLUME 31 (2018)	909
CONTENTS OF VOLUME 31 (2018)	910
