

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 33, Numbers 7-8

July/August 2020

Mousomi Bhakta, Souptik Chakraborty, and Patrizia Pucci, Nonhomogeneous systems involving critical or subcritical nonlinearities .	323
Mukhtar Karazym and Durvudkhan Suragan, Trace formulae of potentials for degenerate parabolic equations	337
Boling Guo and Xinglong Wu, The Cauchy problem of plasma equations modelling magnetic-curvature-driven Rayleigh–Taylor instability in 3D ..	361
Philippe Sosoë, William J. Trenberth, and Tianhao Xian, Quasi-invariance of fractional Gaussian fields by the nonlinear wave equation with polynomial nonlinearity	393
Jishan Fan, Masaharu Nagayama, Gen Nakamura, and Mamoru Okamoto, A weak solution for a point mass camphor motion	431
