

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 36, Numbers 5-6

May/June 2023

Xiongmei Fan, Wei Han, Sen Ming, and Yeqin Su, Blow-up of solutions for the Moore-Gibson-Thompson equations on exterior domain in two dimensions	321
Radosław Czaja and Maria Kania, Exponential attractors for modified Swift-Hohenberg equation in \mathbb{R}^N	347
Kush Kinra and Manil T. Mohan, Existence and upper semicontinuity of random pullback attractors for 2D and 3D non-autonomous stochastic convective Brinkman-Forchheimer equations on whole space	367
Humberto Ramos Quoirin, Jefferson Silva, and Kaye Silva, Zero energy critical points of functionals depending on a parameter	413
Luminița Barbu and Gheorghe Moroșanu, On the eigenvalue set of the (p, q) -Laplacian with a Neumann-Steklov boundary condition	437
Halit Sevki Aslan, Marcelo Rempel Ebert, and Michael Reissig, Scale-invariant semilinear damped wave models with mass term and integrable in time speed of propagation	453
Tomás Caraballo and Nguyen Huy Tuan, New results for convergence problem of fractional diffusion equations when order approach to 1^-	491
