

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 36, Numbers 9-10

September/October 2023

Daniel Daners, Jochen Glück, and Jonathan Mui, Local uniform convergence and eventual positivity of solutions to biharmonic heat equations	727
Tiefeng Ye, Multiple solutions of a nonlinear elastic beam equation supported at two ends	757
Zifei Shen, Minbo Yang, and Weiwei Ye, Semiclassical Nodal Solutions for the Choquard equation	775
Jin Deng, Wei Long, and Jianfu Yang, Multi-Peak solutions to Chern-Simons-Schrödinger systems with non-radial potential	813
Qihong Shi, Global boundedness for the nonlinear Klein-Gordon-Schrödinger system with power nonlinearity	837
Gustavo S. Costa and Giovany M. Figueiredo, Existence of positive solutions for $p&q$ equations involving vanishing potentials with exponential decay	859
