

# DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 36, Numbers 11-12

November/December 2023

---

<b>Medet Nursultanov, William Trad, Justin Tzou, and Leo Tzou,</b> The narrow capture problem on general Riemannian surfaces .....	877
<b>Tatsuya Hosono,</b> Finite-time blow-up for the attractive dominant case of an attraction-repulsion chemotaxis system in the whole space .....	907
<b>Jiangang Qi and Bing Xie,</b> Asymptotic analysis of the first eigenvalues for Sturm-Liouville problems with applications .....	929
<b>Claudianor O. Alves, Eduardo de S. Böer, and Olímpio H. Miyagaki,</b> Existence of normalized solutions for the planar Schrödinger-Poisson system with exponential critical nonlinearity .....	947
<b>Matteo Dalla Riva and Paolo Luzzini,</b> Dependence of the layer heat potentials upon support perturbations .....	971
<b>Razvan Gabriel Iagar and Philippe Laurençot,</b> Finite time extinction for a diffusion equation with spatially inhomogeneous strong absorption .	1005
AUTHOR INDEX FOR VOLUME 36 (2023) .....	1017
CONTENTS OF VOLUME 36 (2023) .....	1018
