

*Homology, Homotopy and Applications*

Volume **3**(1), 2001

1. Introduction to A-infinity algebras and modules Bernhard Keller .....	1–35
2. Chain functors with isomorphic homology Friedrich W. Bauer .....	37–53
3. Tensor products of spectra and localizations Friedrich W. Bauer .....	55–85
4. Teisi in $\underline{Ab}$ Sjoerd E. Crans .....	87–100
5. Methods of Calculating Cohomological and Hochschild-Mitchell Dimensions of Finite Partially Ordered Sets A. A. Husainov and A. Pancar .....	101–110
6. Semidirect products of categorical groups. Obstruction theory Antonio R. Garzon and Hvedri Inassaridze .....	111–138
7. Homotopy Rinehart Cohomology of Homotopy Lie-Rinehart Pairs Lars Kjeseth .....	139–163
8. A Homotopy Lie-Rinehart Resolution and Classical BRST Cohomology Lars Kjeseth .....	165–192
9. The cohomology ring of free loop spaces Luc Menichi .....	193–224
