

ILLINOIS JOURNAL OF MATHEMATICS

Volume 59, Number 2

Summer 2015

Matthias Aschenbrenner and Walter Bergweiler , Julia's equation and differential transcendence.....	277
Yong Chen, Wei He and Yunzhong Hu , Algebraic properties of small Hankel operators on the harmonic Bergman space	295
Robert Auffarth II , Elliptic curves on Abelian varieties	319
William B. Johnson and Gideon Schechtman , A Schauder basis for $L_1(0, \infty)$ consisting of non-negative functions	337
Julie Déserti , On solvable subgroups of the Cremona group	345
R. M. Causey , An alternate description of the Szlenk index with applications	359
Takayuki Hibi and Ayesha Asloob Qureshi , Nonsimple polyominoes and prime ideals	391
A. Stoimenow , Minimal genus of links and fibering of canonical surfaces	399
David R. Pitts and Vrej Zarikian , Unique pseudo-expectations for C^* -inclusions	449
Leonid Mytnik and Jie Xiong , Well-posedness of the martingale problem for superprocess with interaction	485
Harri Varpanen , On a linearized p -Laplace equation with rapidly oscillating coefficients	499
