

ILLINOIS JOURNAL OF MATHEMATICS

Volume 57, Number 4

Winter 2013

Hassan Allouba , Time-fractional and memoryful Δ^{2^k} SIEs on $\mathbb{R}_+ \times \mathbb{R}^d$: How far can we push white noise?	919
Albert Clop and David A. Herron , Mappings with subexponentially integrable distortion: Modulus of continuity, and distortion of Hausdorff measure and Minkowski content	965
A. Mouhib , On 2-class field towers of some real quadratic number fields with 2-class groups of rank 3	1009
Indranil Biswas and Harish Seshadri , On the Kähler structures over Quot schemes	1019
Fausto Di Biase, Toshihide Futamura and Tetsu Shimomura , Lindelöf theorems for monotone Sobolev functions in Orlicz spaces	1025
Debraj Chakrabarti and Kaushal Verma , Condition R and holomorphic mappings of domains with generic corners	1035
David Handelman , Realizing dimension groups, good measures, and Toeplitz factors	1057
João Pedro Boavida , A spectral identity for second moments of Eisenstein series of $O(n, 1)$	1111
Matthew Daws , Remarks on the quantum Bohr compactification	1131
Spiros A. Argyros, Kevin Beanland and Pavlos Motakis , Strictly singular operators in Tsirelson like spaces	1173
