

# Illinois Journal of Mathematics

---

Volume 65 | Number 2 | June 2021

- 261    **Global automorphic Sobolev theory and the automorphic heat kernel**  
*Amy T. DeCelles*
- 287    **Explicit heat kernels of a model of distorted Brownian motion on spaces with varying dimension**  
*Shuwen Lou*
- 313    **Spectral properties of reducible conical metrics**  
*Bin Xu and Xuwen Zhu*
- 339    **Orbifolds having Euler number zero Heegaard decomposition**  
*John Kalliongis and Ryo Ohashi*
- 385    **Cohen–Lenstra distributions via random matrices over complete discrete valuation rings with finite residue fields**  
*Gilyoung Cheong and Yifeng Huang*
- 417    **Quadratic differentials, measured foliations, and metric graphs on punctured surfaces**  
*Kealey Dias, Subhojoy Gupta, and Maria Trnkova*
- 455    **Weighted inequalities for  $q$ -functions**  
*Tomasz Gałazka and Adam Osękowski*
- 475    **An optimization problem arising in CR geometry**  
*John P. D’Angelo*
- 499    **On elements of large order on elliptic curves and multiplicative dependent images of rational functions over finite fields**  
*Bryce Kerr, Jorge Mello, and Igor E. Shparlinski*
- 515    **Hausdorff measures, dyadic approximations, and the Dobiński set**  
*Alberto Dayan, José L. Fernández, and María J. González*
