

# Illinois Journal of Mathematics

---

Volume 65 | Number 3 | September 2021

- 533    **Tangle decompositions of alternating link complements**  
*Joel Hass, Abigail Thompson, and Anastasiia Tsvietkova*
- 547    **Mixing and hitting times for Gibbs samplers and other non-Feller processes**  
*Robert M. Anderson, Haosui Duanmu, and Aaron Smith*
- 579    **A genus 4 origami with minimal hitting time and an intersection property**  
*Luca Marchese*
- 597    **Classification of dominant resolving subcategories by moderate functions**  
*Ryo Takahashi*
- 619    **The wild McKay correspondence for cyclic groups of prime power order**  
*Mahito Tanno and Takehiko Yasuda*
- 655    **A strongly aperiodic shift of finite type on the discrete Heisenberg group using Robinson tilings**  
*Ayşe A. Şahin, Michael Schraudner, and Ilie Ugarcovici*
- 687    **On the multifractal analysis of measures in a probability space**  
*Zhiming Li and Bilel Selmi*
- 719    **Vlasov–Poisson–Fokker–Planck equation in  $E_{2,1}^s$  space**  
*Jingchun Chen and Cong He*
- 735    **On convergence of random walks on moduli space**  
*Roland Prohaska*
