

Illinois Journal of Mathematics

Volume 65 | Number 4 | December 2021

- 749 **Quasisymmetric Koebe uniformization with weak metric doubling measures**
Kai Rajala and Martti Rasimus
- 769 **Complete spacelike hypersurfaces with constant scalar curvature: Descriptions and gaps**
A. Gervasio Colares, Eudes L. de Lima, and Henrique F. de Lima
- 793 **Analysis of a quasi-reversibility method for nonlinear parabolic equations with uncertainty data**
Nguyen Huy Tuan, Erkan Nane, and Dang Duc Trong
- 847 **Rigidity phenomena on lower N -weighted Ricci curvature bounds with ε -range for nonsymmetric Laplacian**
Kazuhiro Kuwae and Yohei Sakurai
- 869 **The Shannon–McMillan–Breiman theorem beyond amenable groups**
Amos Nevo and Felix Pogorzelski
- 907 **A gradient estimate for the Monge–Ampère equation on compact almost Hermitian manifolds**
Masaya Kawamura
