

Illinois Journal of Mathematics

Volume 66 | Number 1 | April 2022

- 1 **Space curves on surfaces with ordinary singularities**
Mengyuan Zhang
- 31 **Baum–Connes and the Fourier–Mukai transform**
Heath Emerson and Daniel Hudson
- 59 **Characterization of saturated graphs related to pairs of disjoint matchings**
Zhengda Mo, Sam Qunell, Anush Tserunyan, and Jenna Zomback
- 79 **Rees algebra and special fiber ring of binomial edge ideals of closed graphs**
Arvind Kumar
- 91 **Metric equivalences of Heintze groups and applications to classifications in low dimension**
Ville Kivioja, Enrico Le Donne, and Sebastiano Nicolussi Golo
