

# JOURNAL OF COMMUTATIVE ALGEBRA

Volume 14

2022

Number 1

---

Divisor sequences of atoms in Krull monoids NICHOLAS R. BAETH, TERRI BELL, COURTNEY R. GIBBONS AND JANET STRIULI .....	1
The quantitative behavior of asymptotic syzygies for Hirzebruch surfaces JULIETTE BRUCE .....	19
The edge ideal of a graph and its splitting graphs JÜRGEN HERZOG, SOMAYEH MORADI AND MASOOMEH RAHIMBEIGI .....	27
Countably generated flat modules are quite flat MICHAL HRBEK, LEONID POSITSIELSKI AND ALEXANDER SLÁVIK .....	37
Splitting the conormal module for licci ideals MARK R. JOHNSON .....	55
Algorithms for checking zero-dimensional complete intersections MARTIN KREUZER, LE NGOC LONG AND LORENZO ROBBIANO .....	61
Catenarian FCP ring extensions GABRIEL PICALET AND MARTINE PICALET-L'HERMITTE .....	77
Annihilators of Koszul homologies and almost complete intersections EHSAN TAVANFAR .....	95
Structure theory for a class of grade 3 homogeneous ideals defining type 2 compressed rings KELLER VANDEBOGERT .....	115
Module-theoretic characterizations of the ring of finite fractions of a commutative ring FANG GUI WANG, DE CHUAN ZHOU AND DAN CHEN .....	141
