

JOURNAL OF COMMUTATIVE ALGEBRA

Volume 14

2022

Number 2

A D -modules approach on the equations of the Rees algebra YAIRON CID-RUIZ	155
A locally F -finite Noetherian domain that is not F -finite TIBERIU DUMITRESCU AND CRISTODOR IONESCU	177
Homogeneous liaison and the sequentially bounded licci property JESSE KEYTON	181
A criterion of Cohen Macaulayness of the form module M. AZEEM KHADAM	219
Use DG-methods to build a matrix factorization ANDREW R. KUSTIN	229
Class groups of open Richardson varieties in the Grassmannian are trivial JAKE LEVINSON AND KEVIN PURBHOO	267
On the nonrigidity of trace modules HAYDEE LINDO	277
On regularity bounds and linear resolutions of toric algebras of graphs RIMPA NANDI AND RAMAKRISHNA NANDURI	285
Legendre polynomials roots and the F -pure threshold of bivariate forms GILAD PAGI	297
