

INFORMATION FOR AUTHORS

Manuscripts

Manuscripts for publication should be sent to Gina Bursan, Department of Mathematics, Harvard University, Cambridge, Massachusetts, 02138, U.S.A. A separate cover should note if the paper is available as an electronic manuscript, and if so, in what format. Please provide your e-mail address if available.

Manuscripts should be written in English, French, German, or Italian, and should be rewritten, double-spaced, with generous margins. Any paper written in a language other than English should include an abstract written in English. Diagrams should be drawn with black India ink on glossy white paper.

To eliminate unnecessary delay or difficulties in printing, authors may be guided by the article, *Manual for authors of mathematical papers*, Providence, R. I.: American Mathematical Society, 1990.

Footnotes, except a possible acknowledgement of assistance or financial support on the front page, should be avoided by being incorporated into the text, perhaps parenthetically.

The list of references must be in alphabetical-chronological order; abbreviations of names of journals and references to books should follow the standard form established by the Mathematical Reviews. The following references are typical examples:

- L. Lorch, *The zeros of the third derivative of Bessel functions of orders less than one*, *Methods and Applications of Analysis* **2** (1995) 147-159.
C. Taubes, *Floer cohomology*, *Monographs on Geometry and Topology*, International Press, 1996.

Proofs

Authors receive only one set of proofs for corrections and will be responsible for the expenses of making excessive alterations of the original manuscripts during the proofreading.

Offprints

One hundred offprints are supplied free for each article. In the case of multiple authors, the 100 free offprints will be divided equally among the authors. Additional offprints may be purchased at a reasonable cost.

Electronically Prepared Manuscripts

The Editors of the *Journal of Differential Geometry* encourage contributors to submit electronically prepared manuscripts in *AMS-L^AT_EX* or *L^AT_EX2_ε*, with the following specifications:

- 11 point type size
- text width 4.7 inches
- text height 7.5 inches
- the document class is book
- q.e.d. is the end of proof convention

Properly prepared manuscripts save authors and editors proofreading time, and editing production.

Electronic manuscripts may be requested (if available) after a paper has been accepted.

Direct all questions regarding the format of the accepted papers to Gina Bursan
