

JOURNAL OF INTEGRAL EQUATIONS AND APPLICATIONS

Volume 35

2023

Number 3

Existence, uniqueness and abstract approach to Hyers–Ulam stability in Banach lattice algebras and an application NADIR BENKACI-ALI	259
Solvability for fractional integral equations via Petryshyn’s fixed-point theorem AMAR DEEP, DEEPIKA SAINI, HITESH KUMAR SINGH AND ÜMIT ÇAKAN	277
A novel method for linear and nonlinear fractional Volterra integral equations via cubic hat functions HAMED EBRAHIMI AND JAFAR BIAZAR	291
Reflected generalized BSDE with jumps under stochastic conditions and an obstacle problem for integral-partial differential equations with nonlinear Neumann boundary conditions MOHAMMED ELHACHEMY AND MOHAMED EL OTMANI	311
Generalized integration operators on some Banach spaces of analytic functions MINGSHAN LI AND ZHENYOU WANG	339
Fast multiscale functional estimation in optimal EMG placement for robotic prosthesis controllers JIN REN, GUOHUI SONG, LUCIA TABACU AND YUESHENG XU	355
Monotonicity of standing waves for the generalized fractional Schrödinger equations YAJIE ZHANG, FEIYAO MA AND WEIFENG WO	375
