

JOURNAL OF INTEGRAL
EQUATIONS AND APPLICATIONS

Volume 6

SUMMER 1994

Number 3

CONTENTS

Pseudospectra and Singular Values of Large Convolution Operators By ALBRECHT BÖTTCHER	267
Singularity Preserving Galerkin Methods for Weakly Singular Fredholm Integral Equations By YANZHAO CAO AND YUESHENG XU	303
Fast Numerical Solution of Singular Integral Equations By P.P.B. EGGERMONT AND CH. LUBICH	335
Variational Method with Application to Convolution Equations By DANIEL GOELEVELN	353
Existence, Uniqueness and Smoothness Results for Second-Kind Volterra Equations with Weakly-Singular Kernels By WEIMIN HAN	365
Asymptotic Properties Via an Integro- differential Inequality By JAMES H. LIU	385
Fast Solution of a Class of Periodic Pseudo- differential Equations By L. REICHEL AND Y. YAN	401
A Time Dependent Parabolic Initial Boundary Value Delay Problem By PAOLA VERNOLE	427
