CONTENTS

Inequalities of the Markov type for partial derivatives of polynomials in several variables By ALBRECHT BÖTTCHER AND PETER DÖRFLER	1
Fast multilevel augmentation methods with compression technique for solving ill-posed integral equations By ZHONGYING CHEN, SIRUI CHENG AND HONGQI YANG	39
Integral equations for conical diffraction by coated grating By G. SCHMIDT	71
Autoconvolution equations of the third kind with Abel integral By LOTHAR VON WOLFERSDORF	113
Sparse discretization matrices for Volterra integral operators with applications to numerical differentiation By HAIZHANG ZHANG AND QINGHUI ZHANG	137
