CONTENTS

Two-scale finite element discretizations for integro-differential equations By HUAJIE CHEN, FANG LIU, NILS REICH, CHRISTOPH WINTER AND AIHUI ZHOU	351
Additional order convergence in quallocation for elliptic boundary integral equations By R.D. GRIGORIEFF	383
Observation of Volterra systems with scalar kernels By BERNHARD H. HAAK AND BIRGIT JACOB	421
Properties of the single layer potential for the time fractional diffusion equation By JUKKA KEMPPAINEN	437
On existence and uniqueness of the mild solution for fractional semilinear integro-differential equations By MOHAMMED MATAR	457
