

# JOURNAL OF INTEGRAL EQUATIONS AND APPLICATIONS

Volume 32

2020

Number 1

---

A well-posed surface currents and charges system for electromagnetism in dielectric media MAHADEVAN GANESH, STUART HAWKINS, COLE JEZNACH AND DARKO VOLKOV .....	1
Nonlinear continuous Fornasini–Marchesini model of fractional order with nonzero initial conditions DARIUSZ IDCZAK, RAFAŁ KAMOCKI AND MAREK MAJEWSKI .....	19
An optimized FD extrapolated scheme based on POD for the 2D integro-differential equation of parabolic type ZHENDONG LUO .....	35
Nonlocal elliptic variational-hemivariational inequalities STANISŁAW MIGÓRSKI, VAN THIEN NGUYEN AND SHENGDA ZENG .....	51
Analysis of boundary-domain integral equations based on a new parametrix for the mixed diffusion BVP with variable coefficient in an interior Lipschitz domain S. E. MIKHAILOV AND C. F. PORTILLO .....	59
A stability result for an inverse problem with integrodifferential operator on a finite interval SEYFOLLAH MOSAZADEH AND HIKMET KOYUNBAKAN .....	77
A new generalization of Browder’s degree MOHAMMAD NIKSIRAT .....	89
An $h$ - $p$ version of the Chebyshev spectral collocation method for Volterra integro-differential equations with vanishing delays LINA WANG, LIJUN YI AND HONGLI JIA .....	101
