**CONTENTS**

|                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| On Necessary and Sufficient Conditions for<br>Exponential Stability in Linear Volterra<br>Integro-Differential Equations<br>By JOHN A.D. APPLEBY AND DAVID W. REYNOLDS ..... | 221 |
| Positive Solutions of a Hammerstein Integral Equation<br>with a Singular Nonlinear Term, II<br>By MARIO MICHELE COCLITE .....                                                | 241 |
| Approximation Methods and Stability of Singular<br>Integral Equations for Freud Exponential<br>Weights on the Line<br>By S.B. DAMELIN AND K. DIETHELM.....                   | 273 |
| Adsorption Integral Equation<br>By GEORGI V. SMIRNOV .....                                                                                                                   | 293 |
