

## CONTENTS

<b>J. SAAL</b> , Maximal regularity for the Stokes system on noncylindrical space-time domains .....	617
<b>A. KODAMA and S. SHIMIZU</b> , A group-theoretic characterization of the space obtained by omitting the coordinate hyperplanes from the complex Euclidean space, II .....	643
<b>R. KLOOSTERMAN</b> , Classification of all Jacobian elliptic fibrations on certain K3 surfaces .....	665
<b>T. ITO</b> , On an integral representation of special values of the zeta function at odd integers .....	681
<b>K. CHINEN and L. MURATA</b> , On a distribution property of the residual order of $a \pmod{p}$ — III .....	693
<b>T. YAMAMOTO</b> , Classification of singular fibres of stable maps of 4-manifolds into 3-manifolds and its applications .....	721
<b>T. HISHIDA</b> , $L^q$ estimates of weak solutions to the stationary Stokes equations around a rotating body .....	743
<b>T. SUZUKI</b> , Lou's fixed point theorem in a space of continuous mappings .....	769
<b>Ei. BANNAI and Etsu. BANNAI</b> , On Euclidean tight 4-designs .....	775
<b>K. NISHIHARA</b> , Global asymptotics for the damped wave equation with absorption in higher dimensional space .....	805
<b>D. FUJIWARA and N. KUMANO-GO</b> , The second term of the semi-classical asymptotic expansion for Feynman path integrals with integrand of polynomial growth .....	837
<b>M. KATOU</b> , New affine minimal ruled hypersurfaces .....	869
<b>H. ICHIMURA and H. SUMIDA-TAKAHASHI</b> , Stickelberger ideals of conductor $p$ and their application .....	885
<b>Q.-M. CHENG and S. SHU</b> , A Möbius characterization of submanifolds .....	903
