

CONTENTS

Y. YONEZAWA , The Turing degrees for some computation model with the real parameter	311
D. CHEN and Q.-M. CHENG , Extrinsic estimates for eigenvalues of the Laplace operator	325
A. LANTERI and C. NOVELLI , Varieties of small degree with respect to codimension and ample vector bundles	341
S. DRAGOMIR , Minimality in CR geometry and the CR Yamabe problem on CR manifolds with boundary	363
C. ROUSSEAU , Déformations de réseaux dans certains groupes résolubles	397
G. XIE and H. MARUBAYASHI , A classification of graded extensions in a skew Laurent polynomial ring	423
G. FICHOU , Blow-Nash types of simple singularities	445
A. ATSUJI , A second main theorem of Nevanlinna theory for meromorphic functions on complete Kähler manifolds	471
S. KURODA , A generalization of the Shestakov-Umirbaev inequality	495
F. BAGARELLO, M. FRAGOULOPOULOU, A. INOUE and C. TRAPANI , Structure of locally convex quasi C^* -algebras	511
S. KAWAKUBO , Kirchhoff elastic rods in three-dimensional space forms	551
Y. MIZUTA and T. SHIMOMURA , Sobolev embeddings for Riesz potentials of functions in Morrey spaces of variable exponent	583
H. TAHARA and H. YAMANE , Logarithmic singularities of solutions to nonlinear partial differential equations	603
