

CONTENTS

Keisuke KIKUCHI , The existence and uniqueness of nonstationary ideal incompressible flow in exterior domains in R^3	575
Ken YAMAMURA , On infinite unramified Galois extensions of algebraic number fields with many primes decomposing almost completely	599
Takahiko NAKAZI , Kernels of Toeplitz operators	607
TomiO UMEDA , Smooth perturbations in ordered Banach spaces and similarity for the linear transport operators	617
Kazuo AZUKAWA , Two intrinsic pseudo-metrics with pseudoconvex indicatrices and star-like circular domains	627
Ken-ichi SHIOTA , On the explicit models of Shimura's elliptic curves	649
Fuichi UCHIDA , Real analytic actions of complex symplectic groups and other classical Lie groups on spheres	661
Ken-iti SATO , Behavior of modes of a class of processes with independent increments ...	679
Takashi ITO and Chie NARA , Quasi-arithmetic means of continuous functions	697
Hiroakira ONO and Noriya KADOTA , Provably recursive functions in fragments of Peano arithmetic	721
Tsuyoshi KAJIWARA , Traces on group extensions and C^* -crossed products	739
