

CONTENTS

Katsuo KAWAKUBO , Induction theorems for equivariant K-theory and J-theory	173
Masao YAMAZAKI , The L^p -boundedness of pseudodifferential operators with estimates of parabolic type and product type	199
Masahiko KANAI , Rough isometries and the parabolicity of riemannian manifolds	227
Masaharu MORIMOTO , G-maps and tangential representations at G-xed points of G-manifolds	239
Shu NAKAMURA , Structure of the scattering operator for time-periodic Schrödinger equations	261
Yoshikazu KATAYAMA , Remarks on the xed point algebras of product type actions on UHF-algebras	275
Maria Lucia FANIA , Extension of modications of ample divisors on fourfolds: II	285
Taizo KANENOBU , Hyperbolic links with Brunnian properties	295
Hiroshi KUNITA , Tightness of Probability measures in $D([0, T]; C)$ and $D([0, T]; D)$...	309
Hitoshi MURAKAMI , A recursive calculation of the Arf invariant of a link	335
Kenji MATSUKI , On pluricanonical maps for 3-folds of general type	339
