

CONTENTS

Masahito DATEYAMA and Tatsuro KASUGA , Ergodic maps of locally compact groups	363
Osamu KOBAYASHI , On a conformally invariant functional of the space of Riemannian metrics	373
Masahiko KANAI , Rough isometries, and combinatorial approximations of geometries of <i>non-compact</i> Riemannian manifolds	391
PL. MUTHURAMALINGAM , Scattering theory by Enss' method for operator valued matrices: Dirac operator in an electric field	415
Ken'ichi OHSHIKA , Exceptional manifolds for generalized Schoenies theorem	433
Akinori MATSUI and Hajime SATO , Stiefel-Whitney homology classes and homotopy type of Euler spaces	437
Tsuneyo YAMANOSHITA , On the spaces of self homotopy equivalences of certain CW complexes	455
Yoshifumi ANDO , On the elimination of Morin singularities	471
Motomasa KOMURO , Lorenz attractors do not have the pseudo-orbit tracing property	489
Sebastian MONTIEL , Real hypersurfaces of a complex hyperbolic space	515
Naohisa SHIMOMURA , The fixed point subvarieties of unipotent transformations on the flag varieties	537
