

CONTENTS

Benno FUCHSSTEINER , Dirichlet states	593
Tzee-Char KUO , The modied analytic trivialization of singularities	605
Masahiro YASUMOTO , Classes on ZF models	615
Shuji OTSUBO , Minimal length of Liouville chain for solutions of an algebraic dierential equation	623
Mitsuru NAKAI , Strong Picard principle	631
Yoshihiro TASHIRO , On conformal dieomorphisms between complete product Riemannian manifolds	639
Takashi ONO , On the relative Mordell-Weil rank of elliptic quartic curves	665
Matsuyo TOMISAKI , Superposition of diusion processes	671
Par Roland GILLARD , Unités elliptiques et unités de Minkowski	697
Takehiko MIYATA , On the units of the integral group ring of a dihedral group	703
Takao FUJITA , On the structure of polarized manifolds with total decieny one, I	709
Morikuni GOTO , Immersions of Lie groups	727
Minoru NAKAOKA , Coincidence Lefschetz numbers for a pair of bre preserving maps	751
Hitoshi KITADA , Correction to "Asymptotic behavior of some oscillatory integrals"	781
