|---|-----|
| Seiki NISHIKAWA and Hajime SATO , On characteristic classes of riemannian, conformal and projective foliations | 223 |
| Heinz LANGER , A class of innitesimal generators of one-dimensional Markov processes | 242 |
| Takeshi HIRAI , A note on automorphisms of real semisimple Lie algebras | 250 |
| Akira KOOHARA , Representation of pseudo-holomorphic functions of several complex variables | 257 |
| Yashiro YOSHIMATSU , On a theorem of Alekseevskii concerning conformal transformations | 278 |
| Atsushi YAGI , On the abstract linear evolution equations in Banach spaces | 290 |
| Yoshimichi TSUNO , On the prolongation of local holomorphic solutions of partial differential equations, II, prolongation across the pluri-harmonic hypersurface | 304 |
| Tsutomu SEKIGUCHI , On projective normality of abelian varieties | 307 |
| Michihiko KAWAMURA and Mitsuru NAKAI , A test of Picard principle for rotation free densities, II | 323 |
| Yasuhiko KITADA , Determination of homotopy spheres that admit free actions of nite cyclic groups | 343 |
| Tsugunori NOGURA , Tightness of compact Hausdor spaces and normality of product spaces | 360 |
| Yoichi MOTOHASHI , On almost-primes in arithmetic progressions | 363 |
| Shukichi TANNO , C^∞ -approximation of continuous ovals of constant width | 384 |
| Takuro SHINTANI , Two remarks on irreducible characters of nite general linear groups | 396 |
