

CONTENTS

Masaru OSIMA , On the Schur relations for the representations of a Frobenius algebra.	1
Kanesiroo ISEKI , A proof of a transformation formula in the theory of partitions.	14
Akira MORI , A remark on the prolongation of Riemann surfaces of finite genus.	27
Masatsugu TSUJI , On the remainder term of Nevanlinna's second fundamental theorem.	31
Makoto MATSUMOTO , The class number of embedding of the space with projective connection.	37
Zuiman YUJIBO , An application of Ahlfors's theory of covering surfaces.	59
Kihachiro ARIMA , On maximum modulus of integral functions.	62
Kihachiro ARIMA , On the zeros of integral functions of integral order.	67
Masatsugu TSUJI , Fundamental theorems in potential theory.	70
Shunzi KAMETANI , An elementary proof of the fundamental theorem of normed fields.	96
Kenkichi IWASAWA and Tsuneo TAMAGAWA , On the group of automorphisms of a function field.	100
