

CONTENTS

R. İ. BAYKUR and S. KAMADA , Classification of broken Lefschetz fibrations with small fiber genera	877
C. OLMOS and R. RIAÑO-RIAÑO , Normal holonomy of orbits and Veronese submanifolds	903
Y. UMETA , Instanton-type solutions for the second and the fourth Painlevé hierarchies with a large parameter	943
C. LEBRUN , Edges, orbifolds, and Seiberg-Witten theory	979
T. KOBAYASHI , Time periodic solutions of the Navier-Stokes equations with the time periodic Poiseuille flow under (GOC) for a symmetric perturbed channel in \mathbb{R}^2	1023
K. GUNJI , On the Siegel Eisenstein series of degree two for low weights	1043
S. SAITO and N. WAKABAYASHI , Sum formula for finite multiple zeta values ...	1069
K. KENMOTSU and T. NAGASAWA , Global existence of generalized rotational hypersurfaces with prescribed mean curvature in Euclidean spaces, I	1077
K. TANABE , A generalization of twisted modules over vertex algebras	1109
Y. FUKUKAWA, M. HARADA and M. MASUDA , The equivariant cohomology rings of Peterson varieties	1147
M. S. TANAKA and H. TASAKI , Correction to: “The intersection of two real forms in Hermitian symmetric spaces of compact type”	1161
A. T. TRAN , On left-orderability and cyclic branched coverings	1169
J. Q. GE, Z. Z. TANG and W. J. YAN , A filtration for isoparametric hypersurfaces in Riemannian manifolds	1179
D. CALEGARI and K. FUJIWARA , Counting subgraphs in hyperbolic graphs with symmetry	1213
J. ITOH and C. VILCU , Every graph is a cut locus	1227
M. I. BELISHEV and N. WADA , A C^* -algebra associated with dynamics on a graph of strings	1239
R. ASHINO, T. MANDAI and A. MORIMOTO , Scaling functions generating fractional Hilbert transforms of a wavelet function	1275
