

VOL. 41 NO. 4

OCTOBER, 1989

CONTENTS

<b>Hideo TAMURA</b> , Resolvent estimates at low frequencies and limiting amplitude principle for acoustic propagators .....	549
<b>Akira MASUOKA</b> , Cogalois theory for eld extensions .....	577
<b>Osamu SAEKI</b> , Simply connected $4 - manifolds$ of second betti number 1 bounded by homology lens spaces .....	593
<b>Katsumi NOMIZU and Ulrich PINKALL</b> , On the geometry of projective immersions	607
<b>Nobuyuki KENMOCHI and Masahiro KUBO</b> , Periodic behavior of solutions to parabolic-elliptic free boundary problems .....	625
<b>Makoto SAKAKI</b> , Estimates on the stability of minimal surfaces and harmonic maps ...	641
<b>Keiji OGUISO</b> , On Jacobian brations on the Kummer surfaces of the product of non-isogenous elliptic curves .....	651
<b>Hideki TANEMURA</b> , Ergodicity for an innite particle system in $R^d$ of jump type with hard core interaction .....	681
<b>Yukitaka ABE</b> , On toroidal groups .....	699
<b>Shintaro MIMA</b> , On the Milnor number of a generic hyperplane section .....	709
