

CONTENTS

Etsuo YOSHINAGA , The modied analytic trivialization of real analytic families via blowing-ups	161
Kazuo AMANO , The global hypoellipticity of degenerate elliptic-parabolic operators ...	181
Shin-ichi NAKAMURA and Hideo SOGA , Singularities of the scattering kernel for two balls	205
Takao YAMAGUCHI , On the structure of locally convex ltrations on complete manifolds	221
Hirotaka FUJIMOTO , On the number of exceptional values of the Gauss maps of minimal surfaces	235
Fumio SAKAI , Ruled brations on normal surfaces	249
Jorg HAHN , Isotropy representations of semisimple symmetric spaces and homogeneous hypersurfaces	271
Keisuke UCHIKOSHI , Construction of the solutions of microhyperbolic pseudodierential equations	289
Ken-ichi SUGIYAMA , An asymptotic estimation of dimension of harmonic spinors	319
Celso MARTINEZ, Miguel SANZ and Luis MARCO , Fractional powers of operators	331
Shoro ARAKI and Katsuo KAWAKUBO , Equivariant s -cobordism theorems	349
