

VOL. 6 NO. 2

SEPTEMBER, 1954

CONTENTS

Masatsugu TSUJI , A metrical theorem on the singular set of a linear group of Schottky type.	115
Masatsugu TSUJI , On Neumann's problem for a domain on a closed Riemann surface. . .	122
Kanesiroo ISEKI , On the fundamental theorem of algebra.	129
Kentaro YANO and Hitosi HIRAMATU , On groups of projective collineations in a space of K -spreads.	131
Tsuneyo YAMANOSHITA , On the dimension of homogeneous spaces.	151
Harley FLANDERS , A remark on Hilbert's Nullstellensatz.	160
Akira MORI , A note on unramied abelian covering surfaces of a closed Riemann surface.	162
Sin HITOTUMATU , On some conjectures concerning pseudo-convex domains.	177
Gaisi TAKEUTI , Construction of the set theory from the theory of ordinal numbers. ...	196
