|                                                                                                                                                          |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Ph. LAURENÇOT and B.-V. MATIOC</b> , A thin film approximation of the Muskat problem with gravity and capillary forces .....                          | 1043 |
| <b>D. HWANG and J. KEUM</b> , Algebraic Montgomery-Yang problem: the log del Pezzo surface case .....                                                    | 1073 |
| <b>M. ASADA</b> , On the ideal class groups of the maximal cyclotomic extensions of algebraic number fields .....                                        | 1091 |
| <b>H. MISHOU</b> , Functional distribution for a collection of Lerch zeta functions .....                                                                | 1105 |
| <b>T. Y. TAM and M. C. THOMPSON</b> , Convergence of Aluthge iteration in semisimple Lie groups .....                                                    | 1127 |
| <b>M. EFENDIEV, A. ZHIGUN and T. SENBA</b> , On a weak attractor of a class of PDEs with degenerate diffusion and chemotaxis .....                       | 1133 |
| <b>K. KOSHINO</b> , Characterizing non-separable sigma-locally compact infinite-dimensional manifolds and its applications .....                         | 1155 |
| <b>T. HIRAI and A. HORA</b> , Spin representations of twisted central products of double covering finite groups and the case of permutation groups ..... | 1191 |
| <b>T. YAGASAKI</b> , Groups of uniform homeomorphisms of covering spaces .....                                                                           | 1227 |
| <b>T. TAKAGI</b> , The $\mathbb{Q}$ -rational cuspidal group of $J_1(2p)$ .....                                                                          | 1249 |
| <b>T. SAITO</b> , Tunnel number of tangles and knots .....                                                                                               | 1303 |
| <b>J. HAN and B. WANG</b> , $\alpha$ -modulation spaces (I) scaling, embedding and algebraic properties .....                                            | 1315 |
| <b>R. GOTO</b> , On the stability of locally conformal Kähler structures .....                                                                           | 1375 |
