

- 471 **Groups whose subgroups are either abelian or pronormal**
Mattia Brescia, Maria Ferrara, and Marco Trombetti
- 501 **A new proof of some of Shintani's formulas**
Mounir Hajli
- 517 **Limiting mixed Hodge structures on the relative log de Rham cohomology groups of a projective semistable log smooth degeneration**
Taro Fujisawa
- 579 **Higher level cusp forms on exceptional group of type E_7**
Henry H. Kim and Takuya Yamauchi
- 615 **Symplectic birational transformations of finite order on O'Grady's sixfolds**
Annalisa Grossi, Claudio Onorati, and Davide Cesare Veniani
- 641 **Discrete approximation to Brownian motion with varying dimension in bounded domains**
Shuwen Lou
- 669 **Dynamics of Chebyshev endomorphisms on some affine algebraic varieties**
Keisuke Uchimura
