

EDITORIAL

SHING SO

In order to focus on his work at the American Statistics Association, Dr. Ron Wasserstein decided to step down from his post as our Statistics Editor. We appreciate his many years of outstanding service to the MJMS and want to thank him for his time and energy devoted to help our journal.

We are pleased that Dr. Hwa Chi Liang will assume the role of Statistics Editor. With her background in statistics and her willingness to serve the mathematics community, we know that she will continue the high-quality work that Ron has done for our journal.

Once again, we want to use our editorial space in this issue to thank our referees. We believe one of the strengths of our journal is the use of a thorough and consistent review. In order to respect the request from many of our referees who prefer to remain anonymous, the list of MJMS referees is no longer included. However, we still want to express our sincere appreciation for the excellent job they have done for us.

The partnership of Project Euclid (<http://projecteuclid.org>) and MJMS continues and MJMS remains as a part of its Prime Collection. Because of our contract agreement, Project Euclid will control the electronic access of the latest five volumes of the MJMS while access to the remaining back issues is still available to the public.

We continue our online MJMS subscription. If you have not renewed or you are a new subscriber, we appreciate your support in filling out the online subscription form at:

<https://www.ucmo.edu/webapps/mjms/>

Your email address will be your userid. Your account will be password protected and will contain your contact information. In addition, you can subscribe/renew by credit card payment (Visa or Mastercard) or payment by check.
